Re: Fabian Froding

To whom it may concern:

This is to certify that Mr. Fabian Froding has been employed as a part-time (50%) software engineer at Evoma AB during 15 March to 31 December 2021. During this part-time project employment period, he has assisted our software team in developing a customized simulation-optimization software for a major European aerospace manufacturer. In particular, he was responsible for customizing a JavaScript-based reporting module for the users to visualize and interact with large volumes of simulation-optimization output data. Despite this part-time project employment was short, he has completed the tasks assigned to him, diligently and independently, to our satisfaction.

Please do not hesitate to contact me if more details about the tasks that he has contributed during his time at Evoma are needed.

Sincerely,

A handwritten signature in black ink, reading "Amos Ng." with a period at the end.

**Amos H.C. Ng**, *MPhil, PhD, CEng (UK)*
